

Dreamtime – Dream Design!

Bask in the warmth of the Seychelles and Mauritius Islands

After more than 26 years in luxury hotel and restaurant development, operating in senior management positions with industry leaders such as Hyatt International and Mandarin Oriental Hotel Group, principal Michael McCann brings an unique wealth of international hospitality design to DREAMTIME AUSTRALIA DESIGN.

The firm is already one of Australia's leaders in restaurant design with recent stand-out successes such as Flying Fish at Pymont's Jone's Bay Wharf, Mu Shu on Bondi Beach, and the Pumphouse in Darling Harbour

With their dramatic creative talent, Dreamtime Australia Design is also branching into other aspects of design- having recently completed offices for Channel 7's Seven Affiliates Sales in Pymont, as well as beginning construction of 3 luxury apartments in Mosman. They are widely recognized by both local and international publications such as Vogue, Belle, InDesign, Trends and Gourmet Traveller

Working with one of Idrawfast's in-house interior designers Selina Chang, Dreamtime's luxurious and sensual designs are cultivated not only from Michael's long personal involvement in the hospitality industry but also various influences that range from the classical to the contemporary. These qualities had came together to produce a design company that is far from the norm.

Interactive Animations from the company that gave you Interactive Perspectives

As promised in a previous issue of enVision, Idrawfast have been working on marrying games technology and animation together and we are very pleased to announce we have solved the issues in this exciting new field.

Now you can have an interactive walkthrough an apartment whereby you or your purchaser can control the direction and the pathway you want. Combined with the ability to click on objects within the scene and open doors, cupboards, turn on the TV and other whiz bang tricks this new product from Idrawfast is sure to be a winner.

To see for yourself call us today on 1300 132 165 for a free sample to be sent to you so you can see the amazing marketing benefits this product will give you.

Idrawfast – the company that gave you interactive perspectives now gives you interactive animations. You can download a sample of this exciting new product from www.idrawfast.com/interactiveanimations.htm

The Idrawfast Difference >>

- > You don't have to book a job 6 weeks in advance
- > You don't have to wait three weeks for a quote
- > You don't need to send us the plans before we quote on a perspective
- > You don't need to deal with 3 or 4 different companies for your needs

Milano Model

Responding to our amazing 2 model deal advertised with the last newsletter, PDG Corporation Pty Ltd commissioned Idrawfast to make 2 large 1:100 models of their exciting development in Melbourne – Milano.

PDG Corporation Pty Ltd is well known for the Verve development in Swanston St, Melbourne which incorporates the award winning Audi showroom.

Idrawfast responded admirably to the challenge, turning around the two high quality models within 25 days. Dedicated to quality and style PDG have been prominent in the Melbourne property scene for some time now and Milano is proving to be no exception with apartment sales going extremely well.

The marketing mix PDG have come up with is certainly a success story and shows that the property market is alive and well, contrary to the 'doom and gloom' stories prevalent in the media.

Crystal Models part 2 – >>

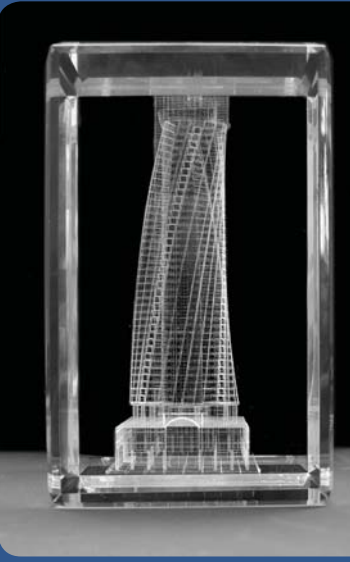

Searching for a novel way to promote your property, reward your clients, or just admire your design?

Last month we showed you a crystal model made for the Pirelli Cable company – a short section of the trans-Bass Strait electrical transmission cable.

Now we can show you the 3 dimensional wonder created using rapid prototyping laser technology.

By building a 3D model in the computer, and hooking it up to a high energy laser system, the laser inscribes a 3 dimensional representation of the building inside the crystal block. Coming in sizes up to 260mm high by 150 mm wide these crystal models are the perfect way to create a lasting memento of the effort and work that went to create your development or design.

Call today to find out how idrawfast can add to sparkle to your design and dollars in your pocket.
